SURF 2022
9TH SYMPOSIUM ON PAVEMENT SURFACE CHARACTERISTICS
Milano, Italy - September 12-14, 2022

"Shaping the future of pavement surface characteristics while accomplishing efficiency, safety, sustainability and meeting next generation mobility needs"

Abstract Due: February 21, 2022

SYMPOSIUM MAIN THEMES

- Next generation mobility (light, electrical, autonomous): new needs, existing and innovative pavements
- Data monitoring and performance assessment
- Surface features and performances (skid, roughness, etc)
- Levels of maintenance and Levels of Service
- Maintenance and preservation treatments
- Pavement management
- Economic and political strategies
- Life-cycle cost analysis and assessment
- Safety and risk issues
- Minimizing road impacts (noise, vibration, pollution, fuel consumption, etc.)
- Sustainability and performances issues about materials and design
- Pavements surfaces and Urban Heat Islands (cool pavements, etc)
- Surface layer design
- Pavements for pedestrian areas (colours, features, etc)
- Hydraulic aspects related to pavement surfaces (slopes, tyre-pavement interaction, draining layers, texture)
- Weather conditions impact (snow, ice, etc)
- Pavements surface of bridges and viaducts (waterproof, eveness, etc)
- Pavements surface in tunnels (including fire related issues)
- Historical pavements and related issues (compatibility, sustainability, etc)
- Airport pavements
- Logistics pavements
